

# CAMsil LG

Product-No.: 100022

## Field of application

**CAMsil LG** consists of two homofermentative lactic acid bacteria.  
For rapid pH-fall for qualitative silages.

- for gras silages
- for clover gras silages
- for alfalfa silages

## Analytical constituents

**CAMsil LG** consists of two EU-notified homofermentative lactic acid bacteria

Concentration: 100 x 10<sup>9</sup> CFU per g

## Dosage recommendation

**CAMsil LG** can be applied with every rate of dilution between 100 ml and 2 litre per ton of silage as far as 1 g **CAMsil LG** per ton silage material is mixed in (100.000 CFU per g silage).

One bag (100 g) inoculates 100 ton of silage.

## Packaging

Aluminium bag à 100 g net weight

## General information

Storage at room temperature ( $\geq 20$  °C)

Shelf life (unopened package) 18 month from production date at  $\geq 20$ °C

Authorisation: The bacterial strains are registered at EFSA under the category 1k silage additives (EU-Registration-No. 1k20749, 1k21013) and is according to Regulation (EG) No.1829/2003 and 1830/2003 assuredly GMO-free.
